Hi, I'm Bari Abbassi

I'm a Product-Minded Software Engineer

I enjoy building products from design to backend. Some of my favorite tools are.

React

Next.js

TypeScript

Node.js

Firebase

3D Hubs

Working on solving the problem of shipping delays in a two-sided manufacturing market place.

Full stack engineer • Sep 2020 - Present

TypeScript

Angular

Redux

Python

PostgreSQL

Ownest

Worked on scaling the core of the company's backend. We were able to go from a few transactions/sec to thousands of transactions/sec.

Backend Engineer • Apr 2019 - Sep 2019

Go

Cratr

Worked on automating the movement of funds between different trading accounts. The program is able to predict prices and decide where to move funds autonomously.

Backend Engineer • Jun 2018 - Sep 2018

Python

PostgreSQL

Atos

Worked on building a UX focused application for a client from scratch.

Frontend Engineer • Jun 2017 - Sep 2017

JavaScript

HTML

CSS

I studied Computer Science in Paris and did an exchange semester in Japan.

University of Paris

MSc + BSc • Computer Science

Tohoku University

Exchange program
